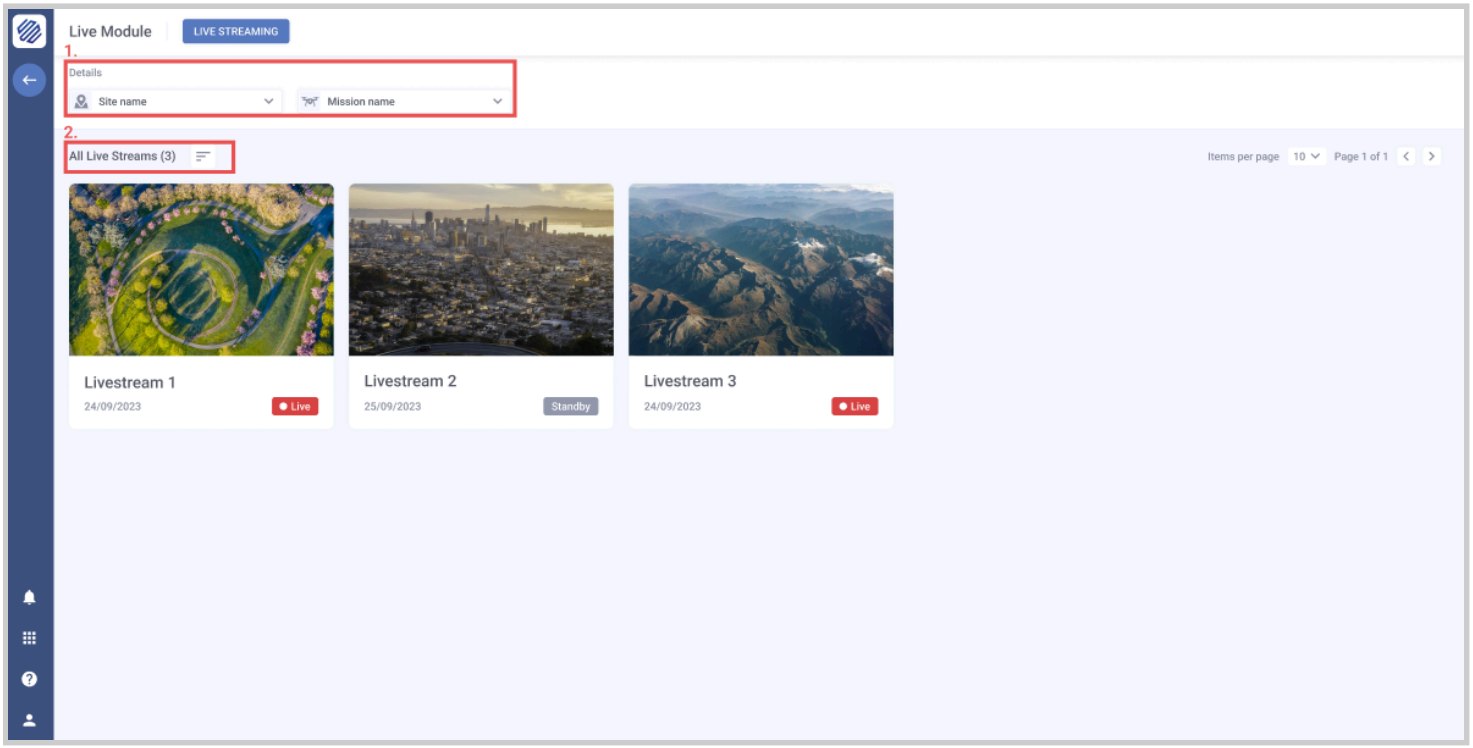
Viewing Livestreams

Updated on 08 Apr 2024 • 1 Minute to read • Contributors

Understanding the Layout of the Live Module Tab

The **Live Module**, lists any active or upcoming livestreams within your organization

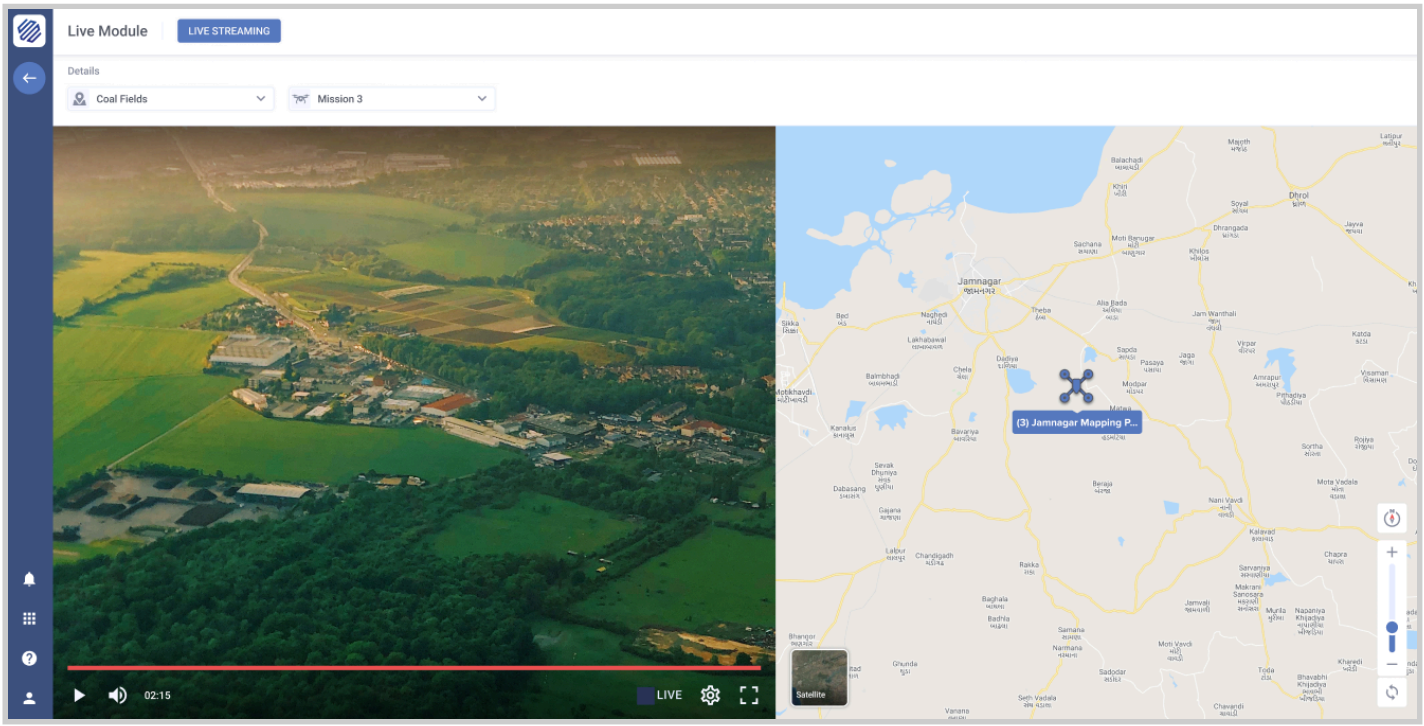


The following options are available in the **Live** module:

Options	Descriptions
Filter by Site option	Displays only the Livestreams from the selected Site
Filter by Mission option	Displays only the Livestreams from the selected Mission
All Live Streams	Displays the Active and Upcoming livestreams > • Mission Manager will only see the livestreams from Missions that they have access to. > • Site Manager will only see the livestreams from the Site that they have access to.
Items per page	Allows you to select the number of Livestreams to be displayed on a page. Use the arrows next to the page number to navigate between pages.

Viewing a Livestream

1. On the **Live** page, click on the livestream that your want to watch. You can view the live feed from the drone on the video player on the left side. Live telemetry data from the flight will be visualized on the right side on the map.



> Once a livestream has ended, the streamed video is uploaded to the corresponding **Site** where the mission was executed. **Click Here** to know more about watching video data in Sites.
