

Copying a Mission

📅 Updated on 15 Apr 2024 • ⌚ 1 Minute to read • Contributors 🛩️

1. On the **Missions** page, in the **Missions timeline** click the mission you want to copy. The Mission sidebar is displayed.

In case of multiple missions scheduled for the same day, a list of missions is displayed. To copy a specific mission, hover over it and click View.

2. In the mission details pop-up, click the **expand** icon. The mission details page is displayed.
3. Click **Manage Mission** and then click **Copy Mission**.

Copy Mission

The **Create Mission** page is displayed with the following details duplicated on the copied mission:

- Project
- Milestone
- Site
- Drone
- Flight(s)

You will be able to view the copied flight(s) only after clicking Add A Flight.

You can select a different project, milestone or site. However, drone and flight details cannot be edited.

4. Define other [mission details](#) and [assign resources](#) as required.
