You can modify missions by:

- [Editing Flight and Resource Details](#)
- [Rescheduling a Mission](#)
- [Cancelling a Mission](#)

Editing Flight and Resource Details

Once a mission is scheduled or is in the Draft stage, you can modify the following details:

- Flight details
 - All the details **except** for the selected payload type
- Assigned resources
 - **All** the resources can be edited

Rescheduling a Mission

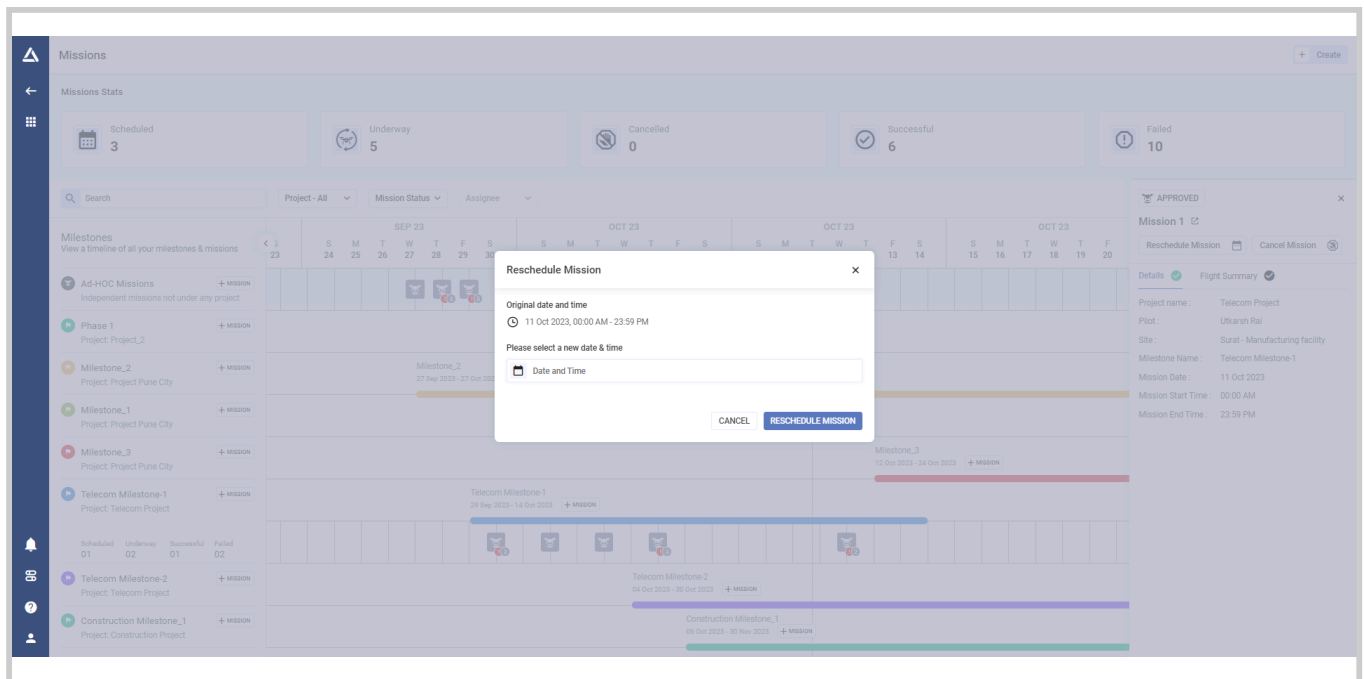

Rescheduling is available for missions in draft or scheduled states. Skydeck automatically checks for resource conflicts when you reschedule, prompting resource reassignment if needed.

You cannot reschedule a mission to start earlier than the current time.

1. On the **Missions timeline**, click the mission you want to reschedule.

In case of multiple missions scheduled for the same day, a list of missions is displayed. Hover over the specific mission you want to reschedule and click View.

2. In the Mission sidebar, click **Reschedule Mission**. The **Reschedule Mission** pop-up is displayed.

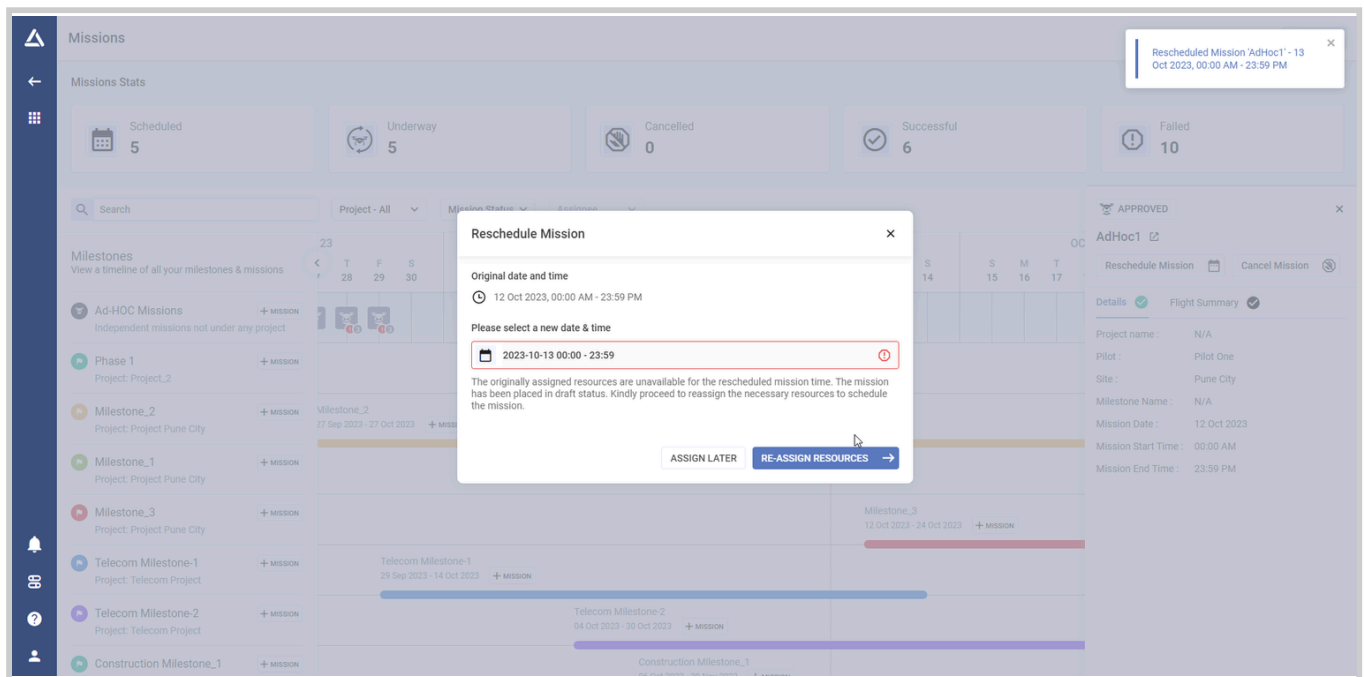

Reschedule Missions

- To reschedule your mission, define the new date, start time, and end time and then, click **RESCHEDULE MISSION**.

If the assigned resources are available for the new time slot, the mission will be automatically rescheduled.

However, if the resources are not available at the chosen time, the mission will return to the draft stage, and you'll receive a prompt to re-assign the necessary resources.

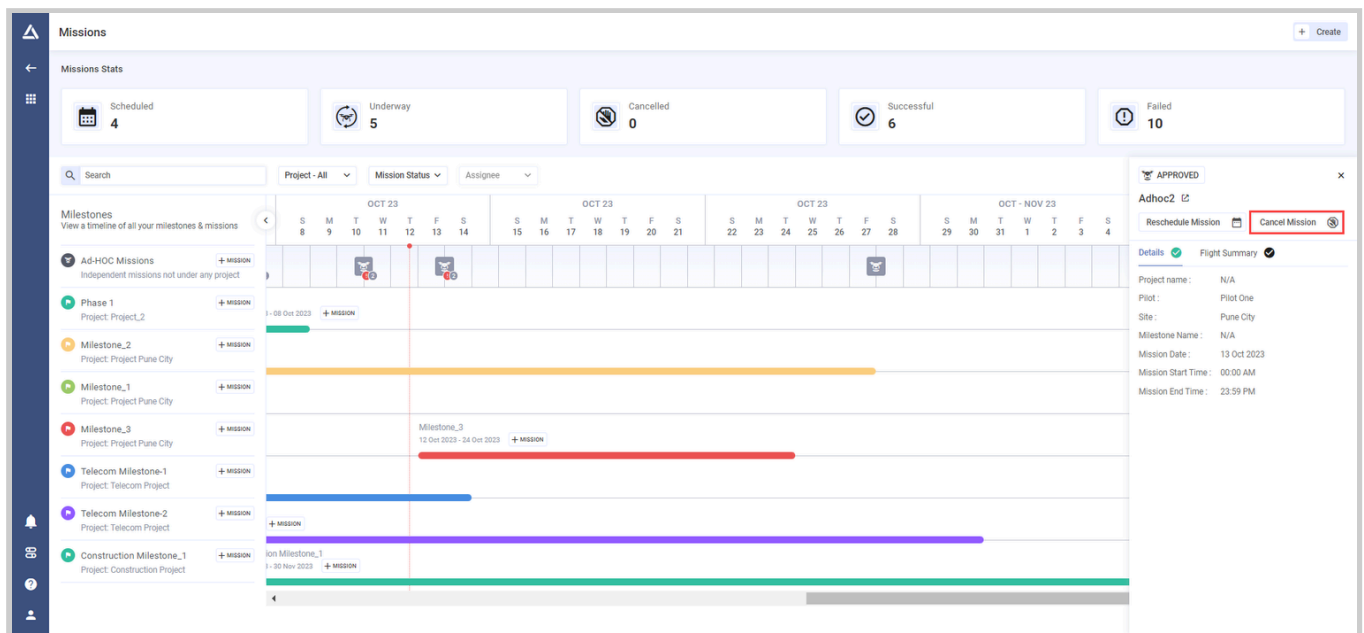

Reassign Resources

Cancelling a Mission

- On the **Missions** page, on the **Missions** timeline, click the mission you want to cancel.

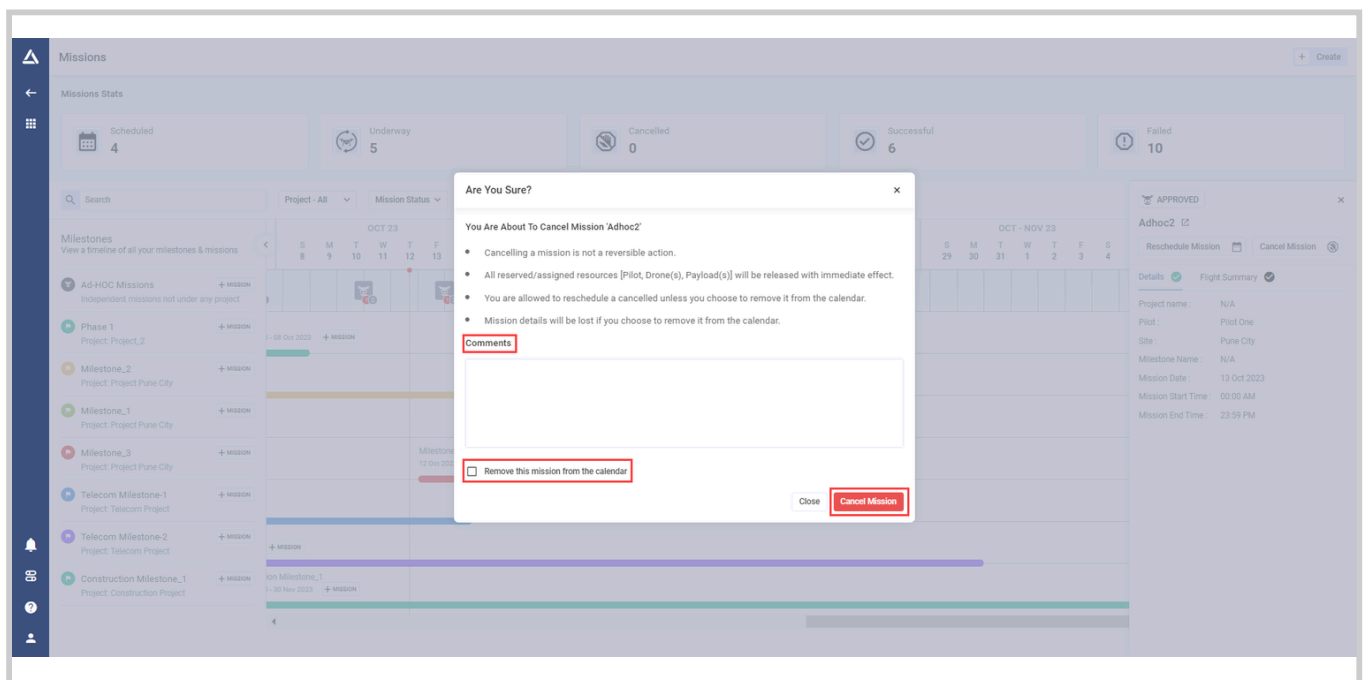

In case of multiple missions scheduled for the same day, a list of missions is displayed. To cancel a specific mission, hover over it and click View.

2. In the Mission sidebar, click **Cancel Mission**.

Cancel Mission

2. In the pop-up that is displayed, enter the **Comments** for cancelling the mission (mandatory). You can also , select the checkbox to **Remove the mission from the calendar** (optional) and click **CANCEL MISSION**.
