

Working with Missions

📅 Updated on 15 Apr 2024 • ⌚ 1 Minute to read • Contributors 

The Missions module on Skydeck is designed to empower drone operations managers with comprehensive mission planning capabilities. With this module, you can effortlessly plan missions, create customized flight plans for precise data collection, and allocate resources seamlessly.

The Missions module also enables you to track the progress of your ongoing and past missions, allowing you to map them to project milestones for accurate project success measurement.

To access the **Mission** module:

- On the **Modules** page, click **Missions**.

Missions on the Module Page

OR In the left navigation pane, click the **Applications** icon and then under **Quick Links**, click **Missions**.

Missions from Quick Links

The **Missions** module is displayed.

The Missions module allows you to:

- [Manage missions](#)
- [Understand the mission stages](#)
