Viewing the Project Analytics
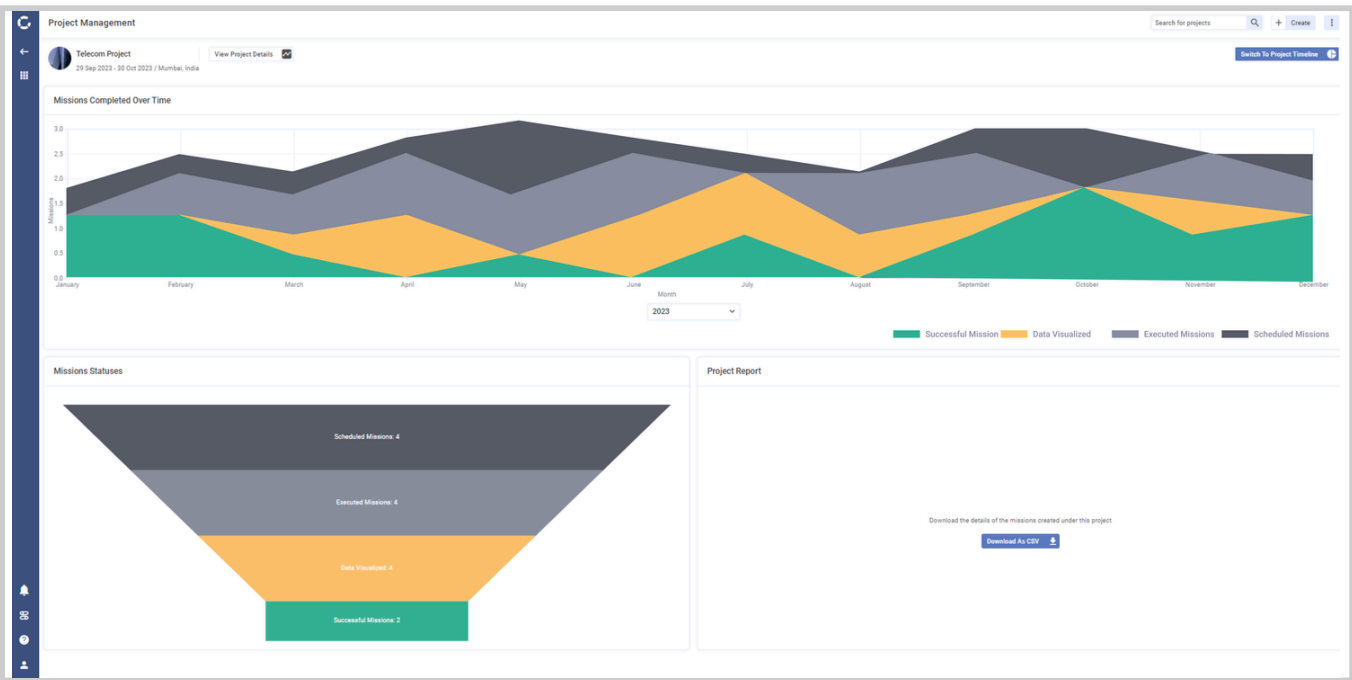

1. On the **Project Management** page, under **All Projects**, hover over the project card and click **View**.

2. On the project page, click **Switch to Project Analytics**.

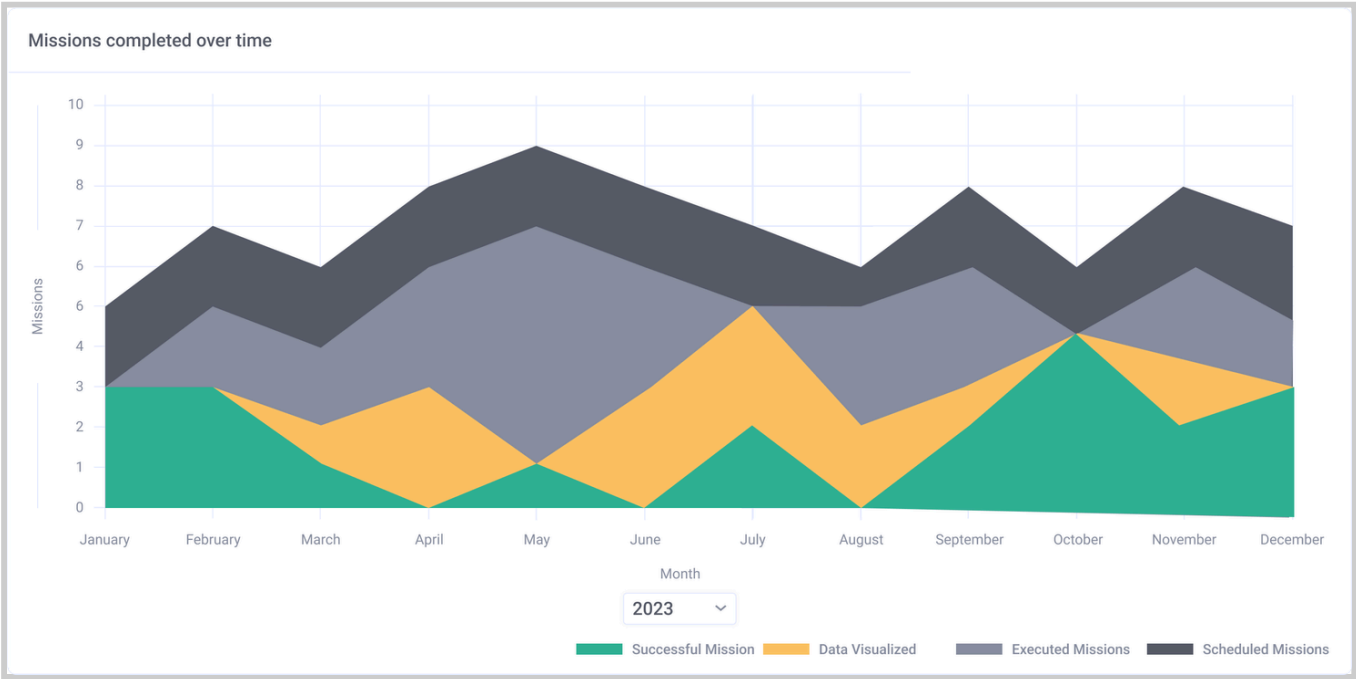

Switch to Project Analytics

The **Project Analytics** page is displayed.

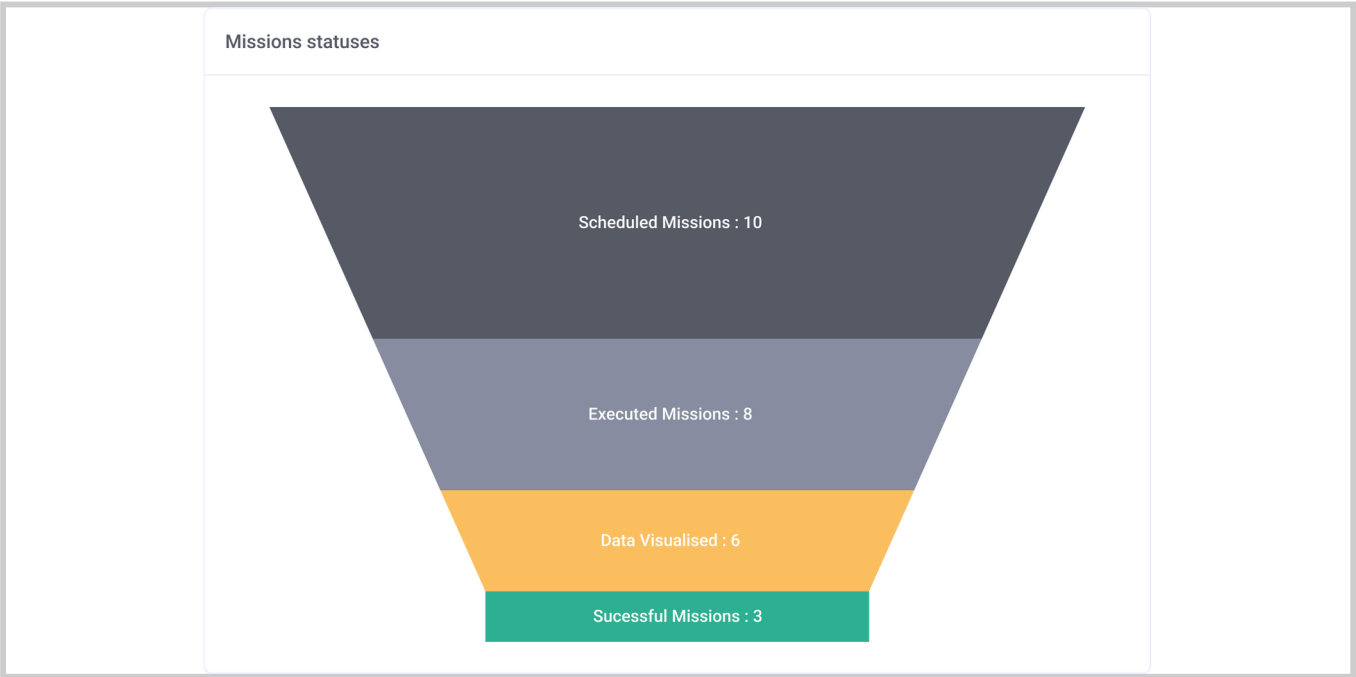

Project Analytics

- Missions Completed Over Time

Missions Completed Over Time

This widget displays the count of missions completed over a defined period of time with different colors representing scheduled missions, executed missions, successful missions and missions with data visualization. You can show or hide a particular mission status on the graph by selecting the corresponding color bar in the legend.

- Mission Statuses

Mission Statuses

This widget displays the statuses of all missions created under this project in the form of a funnel chart.

The missions are color coded with dark grey representing Scheduled Missions, grey representing Executed Missions, yellow representing missions where Data is Visualized and green representing Successful Missions.

- Project Report

Download Project Report

This widget allows you to download the details of the missions created under this project in CSV format.
