# Understanding the Layout of the Missions Page

The **Missions** page gives an overview of all the missions and milestones created by your organization along with details regarding their status and stages of completion. You can either create Ad-HOC Missions or create missions for existing milestones that you have access to. You can also filter milestones according to projects and filter missions according to their status.

Missions Page

The following options are available on the missions page:

Option	Description
Create	Allows you to create: • a single mission **OR** • multiple missions at once via a CSV upload. **You can also create a mission by clicking any of the + MISSION buttons on the Missions timeline.**
Mission Stats	Displays the mission statistics with respect to their current status i.e. Scheduled, Underway, Cancelled, Successful and Failed.
Project Filter	Allows you to filter milestones according to the project.
Mission Status Filter	Allows you to filter missions according to the stage at which they are, for example, Draft, Approved, In Progress and so on. To know more about the mission stages, click **here**.
